Professional Experience and Curriculum Vitae

I work on a diverse range of projects for B2B and B2C organisations and have depth of experience in producing innovative design solutions that directly benefit those businesses. I've been producing work across a wide variety of disciplines such as; advertising, branding, brochure design, book design, eMarketing, events & exhibitions, packaging, point of sale, promotional material and web design, for some of the best agencies across the south coast.

My client list spans the globe, and includes an eclectic mix of brands and organisations from multinationals to startups.

I have been working in the design industry for many years and have held creative positions at some of the most respected design agencies on the south coast. Working at these agencies has allowed me to work alongside and learn from some really talented people.

I don't have any particular style that I work to, nor do I approach every project in the same way. I look at design with an open mind and try to produce work that is innovative, fresh and contemporary but answers the brief in a way that exceeds clients expectations.

Previous Clientele

Sony, Hewlet Packard, BAE Systems, Orange, Virgin Records, B&Q, Countrywide Group
