## Professional Experience and Curriculum Vitae

I design and illustrate completely bespoke wedding stationery and wedding artwork. From Save the Dates, Wedding Invitations and RSVP Cards, to Seating Plans, Menus, Present List and Portraits; I provide individual items to fully themed wedding stationery packages. You can even set the feel for your celebrations right from the outset with themed Hen Party and Stag Do invitations. Wedding artwork is generally either ordered after the wedding day as a commemorative piece or as a gift to give to members of the wedding party or the bride and groom's family as a 'thank you'.

I work closely with two fantastic print studios (one of whom print and frame my wedding artwork and gifts, while the other takes care of all my printed stationery), to provide printed stationery and framed artwork. For couples wishing to print their own stationery, I offer a 'digital file only' service. In this instance I provide high resolution and email-friendly file/s depending on the couple's requirements.

Every bride and groom-to-be are different, so every design is created entirely as a one-off and no two projects are ever the same. I work closely with all my customers at the beginning of the project to get a feel for their personalities, interests and the theme of their celebration. If you have any personal details you'd like incorporating into the design, that's great! Whether you're a fan of France and would like baguettes, wine and berets; you have a sentimental song or lyric you'd like working in or you simply want your beloved pet including as they're an important member of your family, that isn't a problem. I use everything the couples tell me to design original pieces that are completely unique and personal to them.
