5 Tips to Clean Your Carpet

Carpets hide a lot of allergens, dust mites and dander that can trigger allergy reactions

Clean it effectively to improve the overall health of your home

#1 Vacuum regularly

Vacuum the carpets at least once a week to preserve their good look

Try using a crisscross patten when vacuuming

#2 Rejuvenate

Sprinkle soda bicarbonate before vacuuming and wait between 10 and 15 minutes. This way any strange odours will disappear

Add some water to the soda and you have a cleaning solution to remove stains

#3 Use eco- friendly products

Protect your family and try to avoid highly toxic cleaning solutions

They can trigger irritations similar to allergies

#4 Follow The Instructions

Whatever product you are using to clean the carpet, make sure to read the directions and follow instructions

#5 Do a Spot Test

It is important to test any cleaning method on an inconspicuous area of the carpet to make sure it will not affect the colour and the fabric

Otherwise, you may harm the carpet
