Professional Experience and Curriculum Vitae

Huemor Designs LLC was founded by two friends who believed they could really make a positive impact by helping others achieve more success through clean, consistent brand solutions. We believed, and still believe that all business owners, artists, musicians, writers, and cinematographers deserve a look that represents them and what they stand for.

Many long nights, marathon work weekends, and cases of red bull have helped build the foundation of our company. Over time we met others who share our passion and have developed a strong team of creative individuals.

We are constantly looking forward to deliver solutions that can quickly adapt to the changing landscape of our clients markets. We want all of our clients, regardless of size, to consider us as long-term partners with their best interest at heart. We welcome new clients with open arms and enjoy learning about what drives them and where they want to go.

Previous Clientele
