Professional Experience and Curriculum Vitae

With an eye for the details that turn a simple photo in to a story, David Naman has been breaking new ground with his camera since 2005.

Though formally trained, he has never stop self-educating; experimenting, studying, and practicing. The results speak for themselves. Images that capture each unique body, highlighting the curves and individuality of each subject. Nature features strongly in photos - natural lighting, unusual shaping and all kinds of weather inspire him.

Enjoy is work and expect to see more greatness in the years to come. He has no plans to slow down, except to admire the scenery and shoot it.

March - Book Publication -
'International Contemporary Masters IV'

David was selected for this 400 page 2011 International Publication. Thousands of artists from all over the world submit, only 200 were selected. In April David had the chance to meet a lot of the artists from the book in Las Vegas at the 'The Museum of Fine Art'. The artists presented there work for 3 months and move on to other shows around the U.S.
