Professional Experience and Curriculum Vitae
Imaginary Friends Studios was founded by friends, Stanley “Artgerm” Lau, one of the top artists on Deviantart.com with close to 6 million page; Kendrick “Kunkka” Lim, a game designer who worked previously at a Tokyo-based game studio; and Kai “Ukitakumuki” Lim, who at 19 had already art directed two major game mods for Half-Life 2 including Hull Breach and Nuclear Dawn.

Imaginary is much more than a concept art, comics and illustration studio. With its “By-artists-for-artists” mantra and its small but ever-increasing cult-like online fan following, Imaginary truly represents a next-gen creative approach to the creative business by hot-housing its established and fresh new talents, delivering creative services and content to a global audience.
