Professional Experience and Curriculum Vitae
My name is Tom Evans and I am a still photographer.
My specialty is fine art documentation.
My passion is portraiture.

I also impose order on collections of digital images.

In a nutshell, that's what Digital Asset Management is.
The discipline of ordering one's digital assets (image files in my case) and enabling people to store and distribute them. Easily.

What I do is work with you and your associates to do all of that.
From cataloguing and categorizing images to developing a work flow, and to developing a controlled vocabulary.
My team will help you to acquire a customized asset management solution.

Previous Clientele
Available on request.

Awards and Accolades
