WINDOWS BUYING TIPS

1 HOW MUCH NEEDS TO BE REPLACED?

If the existing frames are still, you can use that same replacement units. These fully assembled units slip into the existing frames, saving you money on materials and labour.

PICK A WINDOW TYPE 2

The style of your house and the existing windows may help you decide. The library has great tips on trim colour and hardware. Homes shows various other house styles, as well as the type of windows.

3 PICK A FRAME MATERIAL

Various tests found that there are excellent impact windows regardless of the frame material, except for fibreglass. Vinyl frames are usually the least expensive but aren't as attractive.

DON'T RELY ON CONTRACTOR 4

With all the decisions, it's tempting to let the pro decide. But given the cost of new windows, the more you know about them, the better. Use window ratings and information that can guide in future.

New windows can make your home quieter, more attractive and classy. But replacing your windows is expensive, and there are lots of decisions to make before you start.
