Professional Experience and Curriculum Vitae

I'm James, a 19 year old aspiring graphic designer, studying in Lincoln, UK.

Currently a first year on the BA Graphic Design course. Before i began my degree course, i completed a BTEC National Diploma in Graphic Design, with a final grade of Distinction, Distinction, Distinction.

I love graphics, how essentially an art form can be used to communicate a message, and also how it can go unnoticed, how everybody can see your work without even realising they are looking at it. I have always been a creative person, with a big interest in IT. Graphic Design was the perfect option for me, linking my love of art with my interests in computing. I now live and breathe design, and wouldn't be complete without it.
