Professional Experience and Curriculum Vitae

I'm Jason and I've always loved to draw! I was the kid who spent all his time drawing instead of doing homework in school. So I decided to take my passion to school, I enrolled into the Alberta College of Art and Design in Calgary, and received my Bachelor of Design. (specializing in Illustration)

I have always been involved in current affairs, things of a political nature, and of course portraits! My love for travel has also been a great influence in my work.
