Professional Experience and Curriculum Vitae

I have over 10+ years of experience on a variety of Fortune 500 brands. I specialize in creating UI design but being a professional freelancer I have and continue to perform a wide variety of tasks. I'd like to think that I am able to address most issues should they come up with a background founded in creative problem solving. I do like to present things a little bit differently. I try to use what I've learned over the years to my clients advantage.

Previous Clientele
