Lawn Mowing Essentials

BASIC

1. Buy or borrow proper equipment
2. Check the condition of the mower (ex. blades may need sharpening)
3. Make sure that there isn't any obstacles on your way (rocks, debris, etc.)
4. Don't move around in a spiral - just proceed back and forth
5. Don't go too slowly or grass will clog your blades
6. Tidy up after yourself - use a lawn rake to gather grass clippings along with other green waste

WHEN

1. Best time of the day - mid morning
2. As often as the grass requires
3. During the spring, the usual time between mows is 1-2 weeks
4. According to the grass type some lawns need to be mowed more often - ask lawn mowing professionals for advice

HEIGHT

1. One-third rule
2. Never cut more than one-third of the grass
3. If the grass "gets ahead of you" you can start mowing more often
4. But don't break the one-third rule, because that will temporarily halt all food-making
