Professional Experience and Curriculum Vitae
I am an experienced Art Director and Graphic Designer for print, new media, video and film. For many years I have maintained self-employment by providing a wide range of design services to a variety of clients and projects. My focus has been in the music industry – in print and new media, branding, marketing materials, packaging, advertising and collateral for record labels, bands and individuals. I am a highly versatile designer with a wide range of skills. I am equally adept in both CMYK and RGB workflows.
