Professional Experience and Curriculum Vitae

Jewel Toned Interiors is the collaboration of very passionate and talented individuals, each with a different skill-set. With experience in the corporate, retail and hospitality sectors, we serve all clients that have an entrepreneurial spirit.

Our goal is to cultivate lasting relationships with our clients, while designing interiors that leave a lasting impression on their guests and users.

Interior environments should not be stagnant, instead they should be dynamic and engaging to each and every individual that experiences them across gender, race and generation. Many times the environments we create garner a sense of nostalgia - whether it is the eclectic use of found objects within a space or extremely energetic architecture that calls to your inner child.

We all love what we do and do what we love. Sure, there are crazy insane deadlines and several fires to put out for each project, but the truth is, the challenges are what make us adapt and force us to become stronger, more successful designers.

Awards and Accolades

Known to her peers as fearless and to her clients as a savvy business woman, Joy is a genuine talent to the design world. With over 8 years experience with some of the nations' top firms in the retail and hospitality design sectors, she has recently created a special niche for herself in South Florida. Jewel Toned Interiors is the result of her hard work and determination to get her design vision out to the world.

Joy does not favor one design aesthetic over another. She is a firm believer that everything looks a bit better in vibrant color, but still appreciates the modernistic, neutral monochrome spaces. Each project has a personality all its own, but her interiors are timeless, sophisticated, and always have a touch of unexpected whimsy.
