Professional Experience and Curriculum Vitae
I am an industrial designer based in Manila. As of the moment, I am designing and prototyping my own line of toys and products. I also enjoy taking on interesting projects and helping manufacturers and businesses with their products and branding.

I love making my own things and solving problems through design. A dream project of mine is to redesign the Philippine currency to make it more user-friendly for the elderly and people with low vision and visual impairments.

...and when I'm not busy working, I enjoy gardening (I love herbs!), cooking spicy food, baking, riding bikes, and playing the drums on Rock Band. \m/
