Professional Experience and Curriculum Vitae

My first love was music. I am a songwriter at heart. Creating a product is simply another form of this type of artistry, beginning with an idea, and refining it until ready for presentation. Designing products for musicians is where both of my passions have collided into one. Graduating from the University of Washington with a BDes in Industrial Design, I have applied my education and woodworking experience into the creation of my first product, the Piano Performance Case.

Previous Clientele

Delta Marine - Custom Megayacht Manufacturer
