Professional Experience and Curriculum Vitae

Whether it's Web or Mobile design, Annual Reports, or Print Collateral, I have been delivering award winning solutions to clients for over 15 years. Let me bring your visual communications to the next level. Meet your new Graphic Designer.

My head is in the clouds and my feet are on the ground . . . that is my approach to design. Every design project has a limitless array of possibilities. I enjoy exploring these creative possibilities, but at the same time I acknowledge the need for functionality and clear communication. I believe this interplay is what keeps designs fresh and vital, but also geared towards your target audience. I welcome you to view my portfolio online, and I also appreciate your comments. If you want to discuss an upcoming project you can email or phone me.
