Professional Experience and Curriculum Vitae

Hello, I am Karen. I am known for my comprehensive approach that encompasses physical, mental and spiritual well-being. I started my nutrition career more than three years ago at the California Health Authority when I worked across weight management, pediatrics, heart health, digestive issues and more. I also worked on an astrology project which is Wazifa to convince someone for marriage. Additionally, I am working as a health promotion Dietitian at the Victoria Native Friendship Centre. I have a trusted ability to encourage my clients to eat more mindfully, intuitively and overall improve their relationship with food and their body.
