Professional Experience and Curriculum Vitae

After studying Psychology and Neuroscience at UCSD, I took some time to get back to design and took classes at UC Berkeley for a Professional Certificate in Graphic Design.

I am constantly looking for my next opportunity to learn and grow in my personal and professional life. I've realized more and more recently that I want to create and hope to find myself in bigger and better places for me to do just that.

Now, following my time at a digital marketing agency, I am ready to dive head first into the design world. I hope to take the experiences I've had and knowledge I've gained to become a strong, inspiring graphic designer.
