Professional Experience and Curriculum Vitae
I'm Sumeet Kundhiya, 23 year old, a creative designer who keeps exploring different mediums to express himself. As a Visual Communication and the Arts major with an Applied Art emphasis, Bachelor of Fine Art from College of Art, New Delhi, I have worked with several design house-designed projects ranging from conceptual advertisements to creating promotional materials for several businesses. My classroom experiences combined with my expertise in using different mediums provides an edge to all the artworks created by me, be it manual or digital.I am pretty keen and involved when it comes to creating various kinds of graphics, including illustrations and design.

I possess a love of photo manipulation projects but also work with digital & manual artworks. I am an optimist who loves color music and life and mixing them in the pieces I create.

Photoshop is my tool of choice because it allows me to arrange and modify elements with the greatest of ease and speed. I enjoy mixing hand drawn elements with stock imagery. Photoshop allows me to transform each individual element until I m happy.
