Professional Experience and Curriculum Vitae

I am a fashion photographer with over 15 years experience as an imaging professional. I got my start after receiving my BFA Rochester Institute of Technology While growing as a photographer I served as Director of Digital Evolution department for Pier 59 Studios in New York, and provided customer support and training to customers of the Leaf medium format camera back system.

I understand the photography industry from many sides, client, photographer and vendor side. I have learned how to talk with clients and how to solve the most challenging problem while shooting, cause getting the shot is only part of the job. I am sure that working with me will be more than just work but a lot of fun as well.
