Professional Experience and Curriculum Vitae

I am a Melbourne based illustrator who works from a crazy ex furniture factory studio complete with crooked floor. I call it charm. I have been a passionate scribbler all my life and made an honest living out of it after gaining a degree in Graphic Design. I have perfected my craft over the last 15 years and love to create characters and the worlds in which they exist, sometimes real sometimes fantastical.

Most of my work is in the children's market, though my work charms adults and children alike. My illustration has been used in books, magazines, advertising, packaging, stationary, greeting cards, festivals and even in frames on walls. In addition to my illustration I create large pastel drawings which are regularly exhibited in Melbourne and Sydney, then find homes all over the world.
