Professional Experience and Curriculum Vitae

I am a body painter and studio artist living in Bowling Green, KY. Originally from the mountains of New Hampshire, I migrated south for warmer weather and sunny skies in 2010.

Currently working as a newborn photographer with Our365, I am free to also pursue other areas of art and interest. Specifically, I have joined with Omega Wellness a holistic health organization that allows me to promote the body painting as a therapeutic process for healing and fun.

As an amateur photographer, I take my own images of my work for the documentation and benefit of my clients. Ensuring the remedial experience as a lasting memory.

I dabble in other areas of art consistently. Decorating custom shoes and making murals, paintings and tattoo designs are among the many crafts and creations.

Previous Clientele

Please kindly get in touch for more information.

Awards and Accolades

Locally, body painting has made it's debut publication in the october edition of SOKY magazine and soon to be published in Furies Magazine of Nashville in February.
