Professional Experience and Curriculum Vitae

Everyone carries a story within, that story is what makes each of us unique. Experiences shape us, teach us, strengthens our character and help us grow. I graduated in 2011 with a Bachelor of Art Direction degree in Milan, at the European Design Institute, but before that, i had many different work experiences in foreign countries where I had the opportunity to acquire complex job experiences. Now I set my background contents into business, transferring my skills into creative processes. ///Life is an ongoing challenge///
