Professional Experience and Curriculum Vitae

I'm a photographer who love to work with fashion, beauty and life style. In my work I search to capture not only the beauty but also tell a story with one single image. One of the things that most attracts me to photography is that I have the chance to work with some of the world's top creative minds. The process of creating images is amazing and I usually love the results. I'm a consummate professional who does anything to create the best images, I like to transform ideas into images.
