Professional Experience and Curriculum Vitae

I am a freelance photographer based in the south on England working with an array of clients. Having started with fashion photography my work is much broader now as I like to pursue more conceptual based fine art work. I get my influence from film and its qualities and my favourite work has alluring narrative subtly hinted at with lighting and gesture. I am keen to keep building on my portfolio, increase my client base and produce stimulating work. <http://www.luciegoodayle.com>
