Professional Experience and Curriculum Vitae
I am a Los Angeles based conceptual underwater photographer. I utilize the weightless environment to open up the possibilities of movement and composition. I started as a dance photographer and transitioned into the water about 4 years ago. As a dancer myself, going on 24 years now, I found it natural to work with dancer models in an anti-gravity environment.

Everything comes to life under the water. The flowing garments, jewelry, and beauty products become fresh and light. When I add the elements of bubbles, interesting props, and reflections on the surface, new possibilities open up for creating intriguing imagery.

Previous Clientele
