Professional Experience and Curriculum Vitae

I have over 20 years experience in professional photography. I work for the big named companies such as Marriott, Holiday Inn, Triumph, David Lloyd and many others worldwide but I also undertake work for business start ups and smaller organisations. I love doing what I do and use all my creativity whether its for major client or one person business.

I use the latest Canon 22mpixel technology with only the best L lenses they make ensuring pinsharp images whatever the use is for. On location I use 17 macbook pro to allow myself and the client to view the images and should you have a number of viewers on the set then I can send the images to their ipads as the images are being shot.

I process the images on mac pro back at the studio and having used photoshop for years can make any changes required. Images are finished to cmyk, rgb and web, all on the same disc or emailed to client.

Recently I have moved into videography and have started to undertake corporate videos. Please contact me for examples.
