Professional Experience and Curriculum Vitae

DIGITAL

I have a bit of a predilection towards digital media because it allows me to combine all my skills to create something unique for clients. Although I am not a programmer, I am extremely knowledgeable in the capabilities of all the major programming languages (Flash, HTML, HTML5, CSS, Media queries). This enables me to better connect creative ideas to the technical production of projects in order to utilize these technologies to their full potential.

ADVERTISING

With over 15 years experience in the field of advertising, I have garnered a comprehensive foundation in traditional media. In today's world I see advertising as a multifaceted experience, synthesizing classical with new and emerging media.

SOCIAL MEDIA

I am an active social media user. I help brands develop social media strategies to increase sales through word of mouth.
