## Professional Experience and Curriculum Vitae

I am a Philadelphia editorial, portrait and commercial photographer.

I provide full-service imaging solutions for corporate, editorial and advertising clients. I photograph both in the studio and on location, producing studio portraits, environmental portraits and lifestyle images for a varied selection of clients. I work throughout the northeast including New York City, Long Island, New Jersey, Washington D.C., Maryland and Virginia. As a commercial photographer, I specialize not only in posing and creating imagery, but also in documenting and capturing natural moments and real action.

Recent work, case studies, and personal projects are on my blog.

In addition to being a commercial photographer, I maintain a fine art practice. My fine art work is rooted in ideas of progress, landscape and land usage. My work has won numerous awards and has been featured both in exhibitions and publications.

As a fine art photographer, I accept private design commissions, working with corporate and private clients on custom requests through concept, production and presentation. If you have interest in these services, please reach out through my fine art site. All relevant contact information for my artistic practice can be found at that site, including a full CV.
