Professional Experience and Curriculum Vitae

Not only do I have 5 years of technical and creative experience, I am young, stylistically up to date and eager to adapt to the needs of your company.

I am used to working in a high-paced and professional environment and as a result am able to work with short deadlines.

I have an excellent eye for detail, and take pride in providing my clients with a high-quality transferrable final product that we both are happy with.

Furthermore, I regard each project as a new challenged as as a means to break personal and industrial boundaries. To me, each company's branding needs are puzzles, to which there is not just one solution but, rather, a plenitude. However, to me there is only one RIGHT solution, and that is the one that has the most accessibility and meets the needs of my clients most efficiently.

Previous Clientele
