Professional Experience and Curriculum Vitae

Growing up during the genesis of the wine industry in Niagara-on-the-Lake, I found myself with a lot of time on my hands. I'd often spend countless hours alone, folding paper into origami friends to keep me company. Little did I know this would shape my adult life and career. I have become a designer and brander for a multitude of wineries in this same region and my penchant for transforming paper into animate objects has proved lucrative as I have built my business to incorporate package design as well. A graduate of Ryerson Polytechnic in Graphic Communications and Management and consummate loner, I've shunned the corporate world and stayed true to myself...The Lone Wolf.
