Best Mop for Vinyl Floors: Buying Guide and Top Suggestions in May, 2022

Vinyl floors are quite trendy these days among homeowners. Compared to natural hardwood or laminate floors, they offer a lot more benefits. To name a few, vinyl floorings are water-resistant, more durable, cheaper, while also being affordable.

It's the perfect choice for people who want to have the natural, organic look of natural wood but either don't have the budget or the time to care for hardwood floors.

But although it is highly durable, vinyl floors need care and maintenance, too. Today's buying guide can help you find your very own best mop for Vinyl floors!

1/ Swiffer Sweeper 2-in-1 Mops for Floor Cleaning

Swiffer is such a reputable brand in the house-cleaning business that its name is almost synonymous with mops. For vinyl floors, we recommend the Swiffer Sweeper 2-in-1 model.

Its greatest "offering" must definitely be its budget-friendly cost. If you don't want to splurge too much money on a floor mop, it's basically the perfect choice.

In spite of its affordable cost, the mop feels high-quality in reality. It is made from a mixture of plastic and metal parts. The plastic details can feel a bit flimsy and are obviously a durability concern. Nevertheless, they have held up well during our tests and we didn't notice any cracking or damage (yet).

You can use the mop both as a dry mop and a wet mop. When you need to switch between either dry or wet mopping, just place the correct type of mopping pad or cloth in.

Speaking of mopping pads and cloths, the mop comes with four dry heavy-duty mopping pads and 10 dry sweeping cloths. It also comes with three wet heavy-duty mopping pads and two wet mopping pads.

The pads are made from microfiber, which are soft enough to take care of your vinyl floorings without damaging them.

Do note that they are not washable, but disposable and replaceable. It's not exactly eco-friendly, so a lot of people have taken issue with this design.

2/ 18" Professional Microfiber Mop Floor Cleaning System
