and services of both firms. Our local service network in Taiwan boasts an unparalleled 189 securities branches, supported by 88 bank branches. No matter how big we become, our focus is on not just becoming bigger, but better – with an unwavering focus on how we can provide better financial services for our customers.

Comprehensive financial services
We define our success by enabling our clients to realize their personal aspirations.

Making sense of financial matters in today's world is a complex undertaking. That's why both individual investors and institutional clients rely on Yuanta to provide the right financial products and services to help them navigate the many financial decisions they encounter. Standing alongside our clients as a trusted partner is in fact something we have been doing for the past 85 years, meeting their diverse financial needs and helping them succeed amid an ever-changing financial landscape replete with challenges and opportunities. Client relationships are built one at a time on a foundation of trust, combined with consistent and reliable implementation. We believe we are doing something right when we realize the relationships we have with many of our clients are, in fact, lifelong partnerships.

One-stop shopping for financial services
Quality service has to be backed up by quality financial products. When it comes to investing securities, customers not only can enjoy conventional equities brokerage services, but also can choose from a range of other financial services, including margin financing, options, futures and other derivatives, and offshore equities through sub-brokerage arrangements. We also provide fixed income products, ETFs, and both in-house and third-party mutual funds. Our customers can also choose from a full buffet

of banking services. Whether it's an individual looking for a variety of savings options or financing a new home, Yuanta is there to assist them. Corporations seeking to borrow money to expand their business turn to Yuanta Bank for financing.

Taiwan's innovative leader in financial products
2009 marked a new era in Taiwan's ETF market and Yuanta led the way in pioneering dual-listed ETFs and feeder fund ETFs, both of which allow local investors to participate in Greater China growth opportunities and diversify their investment risk. We also were the lead underwriter for the first overseas company to list in Taiwan in 2010, and in 2011 we led the market in introducing callable bear-bull contracts, a derivative investment product.

For many years, we have not only provided conventional financial services to clients, but also have demonstrated our capabilities in developing new products that help investors succeed amid ever-changing market conditions.
