Professional Experience and Curriculum Vitae

Bed Bug Terminator is a team of specialised pest controllers based in Minneapolis that provide expert bed bug extermination services for commercial and residential services. With access to the industry's leading bed bug extermination technology, the Bed Bug Terminator team provides safe and effective pest control with a three-month warranty.

Why Choose Bed Bug Terminator?

Three-month warranty
Industry-leading services
Friendly service staff
Competitive rates
Most jobs completed within two-three hours
Fast and discreet service
Commercial and residential properties

The Bed Bug Terminator uses a range of innovative extermination technologies to exterminate all bed bugs from your property. After a thorough inspection by the pest control technicians, Bed Bug Terminator will remove your bedding, mattress, box springs and any other infested items into purpose-designed encasements. The INSECT INFERNO® is then used to provide a heat treatment cycle which exterminates all stages of bed bugs and their eggs. This is the single-most effective process of eliminating bed bugs and their eggs from home furnishings. Following the heat treatment cycle a chemical treatment process is initiated using the latest bed bug repellant chemicals.

For the ultimate protection, rely on Bed Bug Terminators.

Bed Bug Terminators is a locally owned and operated Twin Cities business.
