Professional Experience and Curriculum Vitae

I have been a professional photographer for the last twenty eight years and I am extremely creative and conceptual, having huge creative input into the projects I undertake, I can work without art direction, have excellent lighting skills and have proved I have the quality and stamina to take on any job. I am very efficient, always fulfill the brief and never exceed the budget.

I have sourced, renovated and managed ten studios, some for hire also, and created Exposure Gallery and Photospace Training Centre, MPL and now the MD-M modular system which is proving very popular.

Apart from a vast portfolio of bespoke and creative photography, and the creation of many photographs for use as stock images, I have taught, created briefs, exhibited myself and others and hence have a very full and rounded experience of photography.

I am passionate about photography and everything surrounding the visual language which it so well represents.
