Professional Experience and Curriculum Vitae

MusicMagnet is the world's first social media app to connect fans through music. Sync your playlists to your profile and post about who you're listening to, when, where, and why. Bring underground to life or stick to your Top 40! There are no rules to music and no rules to MusicMagnet. Every one of our users will be unique: you'll be an individual with a worldwide audience.

Imagine an all-access backstage pass to see all of your favorite artists at a concert that never ends on this music app... We're taking it to another level: connect with them. You have the ability to view others' playlists, follow them, and chat. The possibilities of the friendships you can make are endless. You'll have Matches where you live and wherever you travel, then it's up to you to be their Magnet.

Once your Match becomes your Magnet, you can view their profiles and they can view yours. Not only can you view each other's profiles but you can start to share posts. These posts will include: your "Now Playing"- or music you are currently listening to-, pictures, and text. They will be uploaded to your Billboard, where your Magnets' posts will be on a constant stream.

Join today and follow your friends, favorite bands or artists, and fans around the world in this music nation.
