## Professional Experience and Curriculum Vitae

I am a graduate from Ontario College of Art & Design University (OCADU) with a Bachelor of Design (BDes) in Graphic Design. My design process revolves around a message-driven design discipline that involves thought, considerable research, conceptual development and image development which is carried out by functional aesthetics and fine execution in every project. My work has been recognized in many online design galleries and design blogs and I have been featured recently in some reputable international magazines and books.
