Professional Experience and Curriculum Vitae
“ To illustrate is to communicate is to move.
To create images from emotion.
The emotion becomes the heartbeat of the image.
It is the image’s soul. To dream, observe, process.
I contemplate the world as I create it.
The questioning look becomes a look of passion.
To illustrate from a desire to see what does not exist.
To shape things not as they are but as I want them to be.
To transform the world and myself by reinventing
the shape of things, of all things.
The invented world is born from the dream of the world.”
