Professional Experience and Curriculum Vitae

I'm a fashion/editorial and beauty photographer, with a keen eye for the unordinary and extraordinary things in life..I have been known to be abit too much in love with what i do. I first started taking portraits back in august 2008 and over time my projects have grown by each shoot from involving a small amount of props to big amounts along with a creative team of talented individuals.

I like to think I have a unique style of capturing a subjects emotion/look with many post processing/lighting techniques but keeping it as real as possible shifting the style away from the highly staged look. I first got into photography when i was a novice graphic designer and I was merely looking to photograph random objects etc to use in my work, then it just went from there to my first model shoot and to where I am today.

Allot of my inspiration comes from my ever lasting music collection I've gathered other the years but a couple of times I've picked up a couple of ideas through some films/advertisements. As I am self taught my main goal is achieved every time I photograph someone but of course sometime in the future I hope to work for some well known magazines/agencies.
