Professional Experience and Curriculum Vitae

Following 13 years of commercial experience leading website design and development teams for high profile clients I established Northern Contrast Ltd in early 2011, offering freelance services specialising in clean and modern designs that are beautiful, accessible and easy to use. I'm well known for my meticulous attention to detail and exacting high standards.

As a full-time freelancer I offer consultation, front end and user experience design and build using modern standards-compliant techniques with progressive enhancement. I combine freelance clients with contract work across digital agencies where extensive experience working within project teams means I can effortlessly slip into an existing development environment.

Previous Clientele

Travelodge
Rizla
