## Professional Experience and Curriculum Vitae

I am an Italian landscape photographer based in the Turin area, part of the north-western region of Piedmont, a land rich of wonderful natural environments offering infinite photographic opportunities.

My aim in photography is to create dramatic and dynamic images capable of producing an emotional response, with stunning natural and man-made sceneries as subjects, utilizing amazing light, wide angle lenses and neutral density filters, and usually waiting a long time in the field for those moments when unusual or harsh weather conditions contribute unique drama and mood.

My photographs have appeared on a large variety of media such as tourism advertising brochures, magazines, calendars, books, home decor and wall art reproductions.

All my images are available for publishing and other usages under a rights managed licensing scheme as stock photography and fine art prints, property decor art and corporate art.

My works are also available as limited and open edition prints as well as in a wide range of high quality ready to hang wall art solutions, and they are ideally suited for gracing and enhancing the spaces of private properties as well as offices, hotels, restaurants, and any other corporate venues.

## Specialties

fine art landscape photography, nature photography, architecture photography, abstract photography, travel photography, rights managed image licensing, fine art prints, digital landscape photography workshops and private tuition.
