Professional Experience and Curriculum Vitae

Through my nine years experience in the commercial photography industry, I have acquired the necessary skill set to produce both technically and aesthetically appealing photographs through the use of stylized lighting and composition. I have been using Phase One's Capture One Pro for 6+ years and Adobe Photoshop for 10+ years.

After completing my Associate Degree in Commercial Photography from the Art Institute of Seattle, I chose to further my education at Brooks Institute of Photography in Santa Barbara, California.

Upon obtaining my Bachelor of Arts, I began working for fashion photographer, Steven Meisel. I gained valuable first-hand experience and knowledge of how a streamlined digital capture workflow is utilized in a fast-paced studio environment.

I am currently seeking a position as a full time Studio Photographer in the Seattle area. As an experienced commercial photographer, I know that I am qualified and would bring additional knowledge and talent to your team.
