Professional Experience and Curriculum Vitae

Latest! - I now offer picture app creation, design, illustration and conversion.

Take a look at my first 3 picture book apps. See my blog for details and drop me an email.

From earlier - Paul Morton has been illustrating and designing and running Hot Frog Graphics

studio for over 25 years, working for a variety of national and international clients.

As well as making a mark in the advertising world Paul has a deep passion for children's books.

'I'd like to try and re-create that special, ethereal charge in the air that children can feel all around at Christmas time. If I could imbue my children's picture books with that kind of magic then I'd be very happy'

In 2007 Paul illustrated 52 mini books for Softplay Inc.

Since then his own creation, Bug Belly is currently trying to attract publishers and he is also working on an illustrated book for Wally Woppapotamus. Paul also illustrates children's boxed games, and has notched up over 30 titles to date.
