Professional Experience and Curriculum Vitae
I am a multimedia personality, both genetically and professionally. I hold a degree in Computer Science, excellent language skills (native Portuguese, fluent English, French and Spanish), long and successful years of work in design and web design (and quite a few awards too), a passion for the arts (digital art, collage, painting, assemblage and music) and I am also a professional musician. I successfully took active part in setting-up, running and selling two IT companies both as partner and owner.

I pursue objectives and am not afraid to take on new challenges, life is a learning process and everything is too connected for me to be satisfied in becoming a "specialist" in one single area, or field of knowledge. If anything, I would love to be a specialist in living and in life itself.

I am a man of my word and very committed to the results, but never neglecting the processes. I am casual and laid-back in appearance, yet formal in dealings and goals. At this point in my life I am also looking for new professional and creative paths, and pursuing them!
