Professional Experience and Curriculum Vitae

I am a professional, published photographer.

I primarily shoot fashion, high-tech design and architecture.

I often work with beginner models, amateurs, semi-professional or the outrageous (unusual), initially looking to work in a spontaneous mode with the possibility of revealing more hidden talents.

My time is like yours: invaluable.

My personal research establishes a real connection with the model... the mood, temperament, character of the model is essential in my view to make it successful and equally as important as beauty.

I am open to explore timid or daring projects, as long as they are sincere and creative. Dancers and actors have an impression of their own body and this is an area I am particularly interested. This style of work, often helps me to define a scenario (or quite simply to exceed it!). I can contribute to the realization of design, portfolio, and always offer (at least) a selection of free images to the models for their own usage + CD.

Campaign advertising and press work are always remunerated and are subject to a contract signed by all parties involved.

The studio space from which I work can accommodate the largest of sets and lodging is available.

Regarding your Bodyguard, you're welcome to bring Granny, Sister or the FBI as long as they wait outside the studio (could be freezing cold in winter !!!) or in their hôtel room -7 km.-, so ASK them to bring their PSP, crossword puzzle, embroidery... This is a PRO Studio, not a show-room ! And I don't speak for the rest of the photographers (I'm working, not teaching!!!)...Keep this in mind when contacting me !

Almost any project you have in mind can be accomplished, so please do not hesitate to contact me, even if you feel apprehensive and I am always willing to accommodate anyone.

My rates are fair and negotiable.
