Professional Experience and Curriculum Vitae
mature student currently studying Illustration and Animation and loving it.
I've developed my drawing skill constantly striving for new techniques. I've sold portraits for over 13 years but money is never the dominant influence. I genuinely enjoy every commission. The drawing process with the tactics of techniques and the emotional element of capturing a likeness. I strive to avoid the clinched tackiness of many pencil portraits. My style is realism based but not painfully so. I feel confident about what I'm doing and I hope that shows through in my work. Available for commissions for portraiture or general Illustrative work.

Previous Clientele
Over 13 years of private individual clients for portrait commissions.
