### Professional Experience and Curriculum Vitae

I was born in Mexico City in 1979. I studied graphic design at Anahuac University completing my education in a self taught way. In several magazines I found a way to release my anxiety to see and share my conception of reality, thus playing for over 6 years as an editorial illustrator. But my obsession for creating unforgettable images and achieve a form of self rescue and fuller expression recently ventured into the area of ??photomanipulation, drawing and any other medium, so this is the site where you can journey through my head, thanks for your time.
