Professional Experience and Curriculum Vitae

Progos is a full-service Magento development company offering Magento extensions, custom design, development, performance marketing and performance optimization.

Currently our products are:

1. Shop By Brand Magento 2
2. Extended Google Rich Snippets

Previous Clientele

1. Magento 2 shop by brand allows you to create a separate brand, supplier or manufacturer listing page. This extension also creates a dedicated details page for each brand and list their entire catalog to let customers easily find products by specific brands. Merchants can import any attribute as brand.

Display brands in Alphabetical order and let customers to search for any brand using advance brands search feature. Merchants can also display featured brands slider at homepage, brands listing & individual brand detail page.

2. Extended Google Rich Snippets Extension for Magento 2 allows merchants to highlight their products and business information in Google Search results. Rich Snippet Extension enables the store admin to add schema tags for organization, corporate contact information, product price, reviews & ratings, social profiles, breadcrumbs, site-links and site search box.

Displaying extra information in Google search results gives you an edge over your competitors for-example in case of "organization" scheme tags - whenever a customer will search for your business name, he will get to see your business name, logo and basic information in Google which can gives an impression to your customer that this is an authentic company
