## **Professional Experience and Curriculum Vitae**

A communication designer from India, my interests lie in illustration and graphic design. Apart from the usual branding, publication and illustration design projects, i do photography as well.

The photographs i shoot try to bring out the raw, factual side of India to the world. I shoot pictures of things and people as they are, I draw them as they are, with an intention to share the unknown beauty of this country with the ones who can benefit from it; everyone else.
